Education

Bachelor of Technology in (CSE)

Bennett University, Greater Noida

2023-2027

CGPA: 7.77 / 10

Projects

ZomatoX – Restaurant Data Analysis | *Python, Pandas, NumPy*

Aug 2025 – Sep 2025

- Conducted exploratory data analysis on a large-scale restaurant dataset to identify pricing patterns, rating trends, and customer preferences.
- Performed data cleaning and transformation including missing value handling, feature encoding, and outlier detection.
- Derived actionable business insights using statistical analysis and visualizations to support pricing and location-based decisions.

TempCast AI – Short-Term Temperature Forecasting | *Python, Prophet, Meteostat*

Oct 2025 – Dec 2025

- Developed a time-series forecasting model using Prophet to predict 7–14 day temperature trends from 5+ years of historical data.
- Performed preprocessing, train-test split, and evaluated model performance using MAE and RMSE against a baseline forecast.
- Implemented CLI and Flask-based interface for interactive forecasting and uncertainty visualization.

IntelliClean – AI-Driven Data Preprocessing Engine | *Python, FastAPI, PostgreSQL*

Feb 2026 – Present

- Designed an automated data preprocessing pipeline supporting CSV, Excel, PostgreSQL, and API-based ingestion.
- Implemented rule-based cleaning (missing values, duplicates, type correction) integrated with LLM-assisted intelligent processing.
- Developed scalable FastAPI endpoints and an interactive Streamlit dashboard for real-time data cleaning workflows.

Technical Skills

Programming: Python, SQL

Data Analysis: Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning, Feature Engineering

Machine Learning: Regression, Classification, Decision Trees, Random Forest, Model Evaluation, Cross-Validation, Hyperparameter Tuning

Statistics: Hypothesis Testing, A/B Testing, Probability, Bias-Variance Tradeoff

Data Visualization: Matplotlib, Seaborn, Power BI, Tableau

Tools: Git, Jupyter Notebook, Google Colab

Certifications & Achievements

- **Data Analytics Job Simulation – Deloitte (Forage, 2025):** Completed industry-based simulation involving data cleaning, exploratory analysis, and business insight generation for enterprise use cases.
- **Analyzing Data Using Python – Infosys Springboard (2025):** Developed hands-on expertise in data cleaning, transformation, and exploratory data analysis using Pandas and NumPy.
- **Explore Machine Learning using Python – Infosys Springboard (2025):** Gained practical exposure to regression, classification, model evaluation, and implementation of ML algorithms in Python.
