

Karan Verma

Skills

Python, Relational Databases, Containerization, Version Control, Unit Testing

Projects

InventoryTracker - Backend service using PostgreSQL for persistent storage, with the schema designed around three normalized tables. The entire application is packaged with Docker for consistent local development, and all changes are tracked using Git with a feature-branch workflow. Wrote pytest test suites covering the core business logic.

Education

B.Tech Information Technology, VIT Pune, 2022-2026
