

NORA WRIGHT

Performance Software Tester | QA Strategies | Test Automation

+1-(234)-555-1234 @ Email linkedin.com Philadelphia, Pennsylvania

SUMMARY

With 5 years of experience in performance testing, skilled in JMeter and LoadRunner, ensuring software efficiency and scalability. Expert in diagnosing performance bottlenecks, collaborating with cross-functional teams, and implementing sustainable solutions. Achieved a 30% reduction in load times across key applications through optimized test scripts.

EXPERIENCE

Performance Software Tester

Initech Solutions

01/2026 - Present Philadelphia, PA

- Designed and implemented comprehensive performance test plans, improving system reliability by 25% using JMeter.
- Executed automated performance test scripts, reducing testing cycle times by 20% through efficient regression testing.
- Collaborated with development and QA teams, successfully mitigating performance bottlenecks in under 3 days.
- Provided detailed analysis of performance metrics, enhancing application responsiveness by 15% for clients.
- Enhanced the testing infrastructure, ensuring seamless integration with CI/CD pipelines for continuous delivery.

QA Engineer

TechWave Innovations

05/2023 - 12/2025 Philadelphia, PA

- Led performance testing initiatives for a major healthcare application, improving transaction speeds by 40%.
- Developed automated scripts for performance testing, reducing manual effort by 30% using LoadRunner.
- Monitored system performance with Dynatrace, providing actionable insights to stakeholders and improving system uptime.
- Mentored junior testers in best practices for performance testing, fostering a collaborative and effective team environment.

Software Testing Specialist

NextGen Software

01/2021 - 04/2023 Philadelphia, PA

- Conducted performance assessments that enhanced application speed by 20% across multiple financial services platforms.
- Utilized New Relic to monitor application performance, aiding in the rapid resolution of critical system issues.
- Partnered with developers and product managers, driving successful adoption of new testing methodologies.
- Streamlined performance test execution, resulting in a 15% increase in testing throughput within the team.

EDUCATION

Bachelor of Science in Computer Science

Drexel University

01/2018 - 01/2021 Philadelphia, PA

PROJECTS

Open Performance Metrics Tool

Developed a niche tool for visualizing performance test data to improve analysis efficiency. GitHub link: github.com/opmtool

Automated Testing Framework

Designed an open-source framework for automated performance testing to enhance modularity. GitHub link: github.com/autotestframework

KEY ACHIEVEMENTS

System Load Optimization

Reduced system load times by 30% through optimized testing procedures, improving user satisfaction.

Testing Infrastructure Revamp

Led a project to revamp testing infrastructure, which resulted in a 50% increase in testing efficiency.

Collaboration for Software Launch

Collaborated successfully with developers and QA for the launch of a key software feature, reducing bugs by 25%.
